

• Ever-Lok 2 Proves Unit Integrity with Minimum Effort • Eliminates Strapping • Saves Time & Money • Adds Efficiency

## SAFER, FASTER, REUSABLE SHIPPING ...

### HERE'S WHAT YOU'VE BEEN WAITING FOR!

### BIG-PAK's New Ever-Lok 2 Self-Locking Clip.

This new, durable, high-density polyethylene locking device provides a quick acting secure closure between sleeves and thermoformed polyethylene top and bottom pallets of BIG PAK® returnable and reusable shipping and storage containers.

Self-locking, the easy to use Ever-Lok 2 provides safer, simpler and faster closure, and eliminates the need for strapping or shrink wrapping. Sleeves are more securely held to pallets due to the positive action of the twist locking design.

Typical corrugated plastic sleeve with all eight clips located out of normal forklift entry range, preventing handling damage and assuring long life.

Ever-Lok 2 installed on a typical Big Pak corrugated paper sleeve and ready for storage or interplant transport.

Stackable-collapsible "Big-Pak" now with "Ever-Lok" clips in popular sizes and all sleeve heights.

Other sizes and "specials" quoted promptly on request. Minimum quantities may apply. New sizes being added constantly. Call Ted Thorsen for details.

The Ever-Lok 2 Clip turns and locks, positively and easily into place as the pallet is pressed into position, and can be visually inspected at all times. The Ever-Lok 2 comes installed on your collapsible sleeves where its flush mount design prevents damage in use.

Recessed within the pallet, the self-locking clip must be physically turned to disengage. This prevents premature release by lateral pressures or accidental bumping. Eight clips are fastened by a bullnose plastic rivet on each sleeve, providing more secure engagement than a grommet fastener.

Ever-Lok 2 Clips are available in bright blue to promote safety and visibility. They are removable and replaceable.

**Patent Pending  
Samples are available.**

**Call Ted Thorsen to  
discuss your size and  
quantity requirements**

## Ever-Lok 2 Secure Locking Clips

A simple twist does the job. The secure locking action on this mechanism can be repeated 1000's of times without loss of function or damage.

**8 "Ever-Lok 2" clips provide a simple, visible positive closure top and bottom.** Bright blue clips promote safety and visibility.

"Ever-Lok 2" holds typical Big Pak loads of up to 1200+ lbs. during stacking, fork handling, and truck transport.

Ever-Lok 2 (Patent Pending)

Clip in "Open" Position

No awkward reaching, no stubborn slides, the action is quick and sure, on top and bottom of every Big Pak. Pallets and sleeves separate easily and completely.

A test in your plant will demonstrate the success of this concept. Call Ted Thorsen to make arrangements.

**To remove a Big Pak top or bottom, simply turn the "T" Lock and lift.**

## Original Sur-Lok® Clips Also Available

8 "Sur-Lok" clips/unit provide a simple, automatic positive closure top and bottom.

The Sur-Lok Clip audibly locks, positively and easily into place as the pallet is pressed into position, and can be visually inspected at all times.

To remove a Big Pak top or bottom, simply push Sur-Lok clips and lift.

Big Pak mirror image trays, triple wall sleeves, and "Ever-Lok 2" clips are the economy team for your interplant transfer and storage requirements.

This simple but highly effective design will work well in your operations.

Samples available for your test and evaluation. Call Ted Thorsen for more information.
