

Special Switches

#820 Ball-Bearing Parallel Stacker or Trolley Accumulator Switch

Trolleys will transfer from traveling on one rail to traveling on two rails, thus accumulating them side by side. After Trolley passes, switch will resume to its original position. Accuracy and reliability are effectively increased with the use of a ball bearing axle. Specify Trolley length. (24", 30", 36", or 42")
 #EM-820 RH (Right Hand) • #EM-820 LH (Left Hand) Price: \$198.73

#822 Reversible Parallel Stacker

This switch will do exactly the opposite than the above switch. Trolleys traveling on two rails will be transferred onto one rail. Specify Trolley length (24", 30", 36" or 42").
 #EM-822

#824 Hinged Knife Switch

Equipped with a Plain Knuckle on one end and a Lift-Out Knuckle set on the other, this switch can be raised out of the way when needed. Standard length is 32"; other lengths made to order. #EM-824

#826 Removable Bar Switch

With Lift-Out Knuckle sets on both ends, this switch can be removed when needed. Standard length is 32"; other lengths made to order.
 #EM-826 | Specify 1 1/2" or 1 3/4"

#828 Cross-Thru Switch (Benski Switch)

Contains a spring loaded plunger lock which is manually inserted into a Bushing. Allows Trolley to cross through rail. Specify number of Bushings needed. Standard length is 10"; other lengths made to order. #EM-828

#830 Vertical Automatic Fire Door Switch

Used to split rail automatically in case vertical fire door is activated.
 #EM-830R (Right) • #EM-830L (Left)
