Ergonomically Designed Sit-Stand Stool

Relief For Workers Who Can't Sit Down On The Job

Increase the productivity of workers who are on their feet all day. Ergonomically designed to allow the user to work in an upright, standing position while most of their weight rests on the padded seat, taking the load off the worker's legs and feet.

FEATURES:

- Base design allows positioning up close to work station or production lines.
- Four strong nylon anti-slip glides provide stability on most flooring.
- Ergonomically formed padded polyurethane seat swivels 18 degrees in either direction, returns to center automatically.
- Seat tilts forward up to 20 degrees, swivels 16 degrees.
- Seat height adjustable from 22 1/4" to 32 1/2" for workers of almost any size.
- Meta black tubular steel base.

Folding Ergonomic Sit-Stands

ERGONOMIC WORKERSEATS

From a low crouch to a standing position, the seat height of the VE-CPRO-200 and VE-CPRO-600 can be adjusted in 2" increments by removing the seat and hooking it to the horizontal bars located on the chair frame. These units have four rubber "shocks" under the seat base that allows the seat to tilt forward, left and right so it can accommodate your body movements. The front tilted position of the seat helps the user maintain the natural posture position of the spine.

The portable work chair, model VE-CPRO-800LP is not only convenient, but easy to use. Simply unfold the rear legs and slide the contoured padded seat to the desired ergonomic height. The infinite adjustability guarantees the optimum work posture. Folds up to a 4" profile for easy portability and storage.
