

## The Leader in Reusable/Collapsible Shipping Containers.

The Most Efficient, Most Versatile and Safest System for Transporting and Storing Components and Finished Products in Bulk or in Individualized Containers

**BIG PAK** containers are reusable, returnable and recyclable shipping systems that protect products while achieving a high return-on-investment.

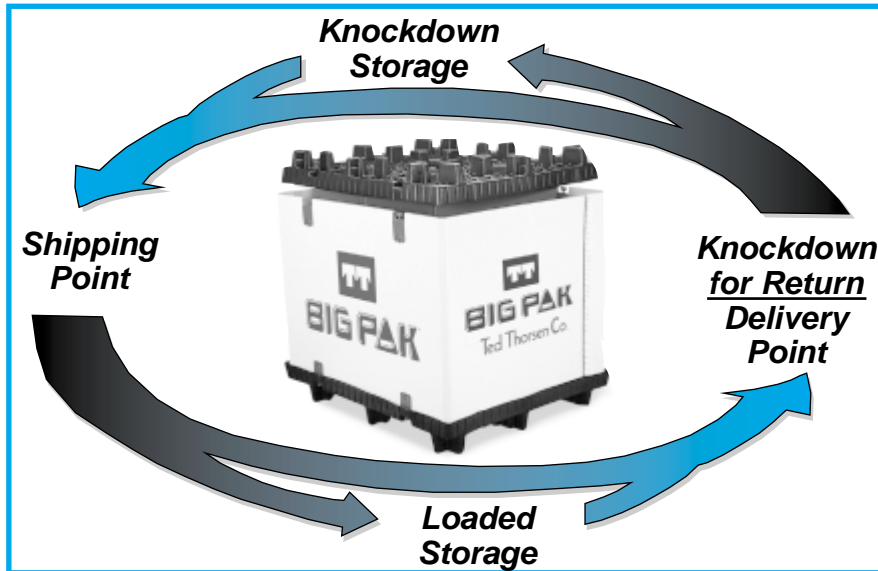

**BIG PAK® Shipping Systems are popular in Apparel, Textile, Chemical, Automotive and Wholesale/Retail Markets.**

With the industry's largest selection of collapsible sizes, BIG PAK Shipping Systems can help you package

and protect everything from auto parts to zippers while saving space, time, and money.

**30 Standard and Special Sizes Available.**

**We have a Big Pak to do your job.**

BIG PAKS®, Wheel PAKS, Tote Paks, and Yarn PAKS are the quickest, safest, and most convenient way to move work-in-process and finished goods in closed-loop systems.

Our lightweight systems are available in single- or twin-sheet mirror image, as well as twin-sheet thermoformed pallet and cover with conveyor capability.

They come in a large variety of sizes for almost

## Now Better Than Ever -- Big Pak Components

with easy operating features and proven design choices.

**Easy Access Sleeve Options**

**Mirror Image Interchangeable Pallets Provide Secure Interlocking Legs and Nestability**

**Multiple Use Applications**

**Ease of Handling for Storage and Shipping**

### FEATURES / OPTIONS / PRICES / INFO:

**One complete unit consists of two mirror image pallets and one sleeve**

- Lightweight and fully nestable to save space and reduce shipping costs
- Top and bottom pallets are interchangeable – less inventory
- Units can be completely secured using straps, plastic banding, or Big Pak's patented EverLok®2 Self Locking Clips
- Weather resistant – resists UV rays
- Four-way fork lift and pallet jack entry
- Ideally used in closed-loop systems or for JIT deliveries
- Interlocking pallet legs for secure stacking
- Sleeve storage made easy with flat or Z-fold designs – delivering sleeve nesting efficiency
- Legs with drain holes reduce 'vacuum effect'
- Standard pallet color: black Other choices available
- Color stripe(s)
- Sleeve custom printing and corporate imaging for easy identification
- 8 logo areas: allows customized molded art on top surface
- Internal Dividers
- Hanging Bars
- Twin Sheet & Steel Reinforced Heavy Duty Designs Available
- Many sidewall sleeve options including:
  - Wire, molded plastic, triple-wall fiberboard, corrugated plastic, and new twin-sheet thermoformed sidewall styles. All choices fully collapsible.
  - Hinged access gates
  - Removable sides
- Prices are based on size, quantity, and special design features
- Typical price range for one unit is [CALL] depending on size, quantity and options
- Custom colors/side stripes

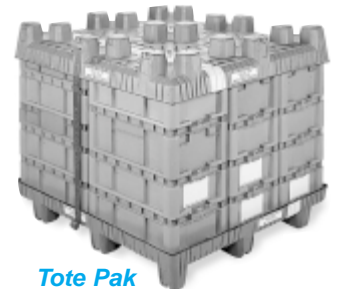

# The Ideal Interplant Transfer and In-Plant Storage System.

**Standard & Special Design Big Pak®**

**Conveyable BIG PAK**  
for all applications

**Tote Pak**  
for parts and assembly

**Big Pak® Systems** are interchangeable pallets and covers with a variety of sidewall styles – protecting content from dust, dirt and damage. They are the quickest, safest, most convenient way to move work-in-process and finished goods, especially in a closed-loop circuit. Durable, single or twin-sheet thermoformed polyethylene pallets and sidewalls have multiple applications in apparel/textile, agriculture, automotive, wholesale/retail markets and others.

- Mirror image design enables product to be used as a pallet and cover
- Four-way entry – quick, efficient
- Safe and secure stacking with interlocking legs

**Yarn Pak**  
for textile and wire core applications

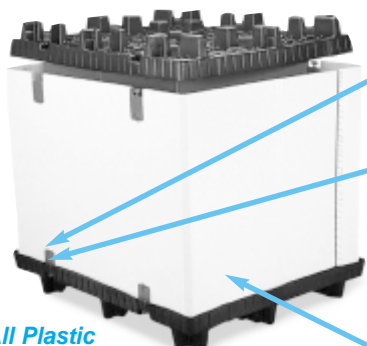

**Yarn Spools**  
many sizes accommodated

**Interlocking Legs**  
for secure stacking

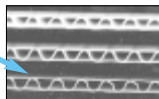

**Wheel Pak**  
for automotive applications

**All Plastic Locking Sleeve Pak**  
- New Everlok®2 Sleeve to Pallet Self Locking System and 10mm corrugated plastic wall.

**Ever-Lok®2**  
to eliminate strapping

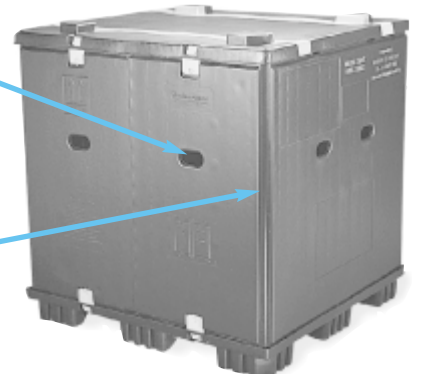

Corrugated Plastic Wall

**Ask us to match an existing size Big Pak to your exact requirements. Sizes and additional data on the following pages.**

**Sleeve's Living Hinge**

**Twin Sheet Thermoformed BIG PAK**  
for heavy duty and specialty projects

# BIG PAK Reusable Collapsible Shipping Containers

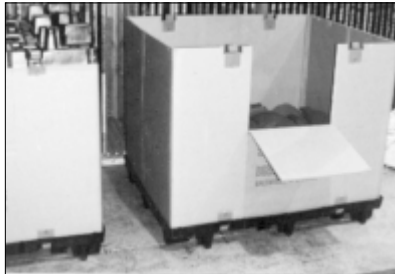

**The economical answer to secure interplant transfer and storage.**

More than 30 sizes to meet every requirement.

- Factory assembly and work-in-process
- Order picking and fulfillment
- Warehouse and distribution
- Government and Military
- Agriculture and Bulk Processing
- Offshore Transport

**BIG PAKs are the Choice of Domestic and Offshore Consumer Goods Producers** from Production to Shipping, BIG PAKs move work in process and finished goods for dozens of major international manufacturers. Cut the cost of disposable packaging.

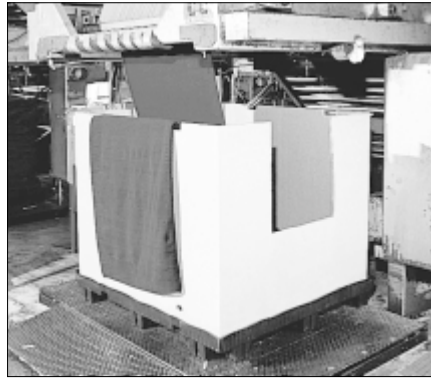

- Choose from more than thirty pallet sizes and any sleeve height. Include optional doors and access panels, if needed.
- Select standard design or Ever-Lok<sup>2</sup> Self Locking assembly. Both use patented Big Pak mirror image pallets.
- Ted Thorsen knows interplant transfer, and we're glad to share our experience with you.
- Original "Sur-Lok" clips are available as replacements.
- Call ☎ for prices and availability.

Optional drop access panels and Ever-Lok<sup>2</sup>™ connectors make Big Pak a pleasure to set up and use. Sleeve heights are to your specifications. Load capacities to 1200 lbs. distributed. Units stack 3 or 4 high.

Every Big Pak has 3 easy to assemble components: 2 long life plastic pallets and 1 reusable folding triple wall corrugated fiber, plastic or wire mesh sleeve.

**Easy Access.** Pallet jacks and forklifts can approach Big Pak pallets from any side, saving time and loading space. (Some Pallets have two-way pallet jack accessibility.)

- Prices are based on size, quantity, and special design features.
- One complete unit consists of two mirror image pallets and one sleeve.
- Typical price range for one unit is [CALL FOR PRICING] depending on size, quantity, and features.

"Big Pak" will fit your trailers, trucks, or offshore containers. Samples are readily available. Call ☎ Ted Thorsen for details.

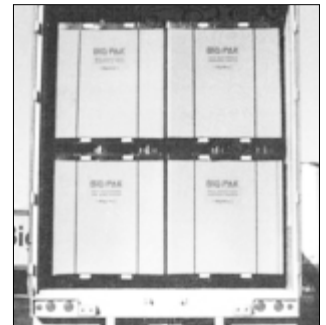

Load and unload easily with optional drop panel.

3 easy to assemble components.

4-way fork lift entry; 2 and 4-way pallet jack entry.

Maximize cube.

Final inspection of bulk packaged apparel flows directly into Big Paks, which are easily pre-positioned by Hand Truck, Fork Truck or manual dolly, and then removed when full. This concept also works well with bundles of cut work or other packaged products. Call Ted Thorsen to discuss applications to your operations.

Bulk storage couldn't be easier or more convenient than in this 4 hi secure stack Big Pak layout. Put hi-cube storage where you need it! Doors on Big Paks facilitate picking in a stacked layout. Ted Thorsen can design a sleeve access/door system to meet your needs.

Bulk picking and large or small order packing is facilitated by this arrangement of sloped deck wide span rack with open Big Paks and conveyor with picking totes. Let Ted Thorsen help with ideas to improve your pick-pack operations.

# Now **BIG PAK** Makes a Good Shipping Container Better

## Eliminates strapping – saves time – saves \$ money \$ – adds efficiency

Sturdy injection molded plastic locking clip maintains a quick acting closure between sleeve and trays without strapping or shrink wrapping, and it's easy to use.

### SAFER, FASTER, REUSABLE SHIPPING ...

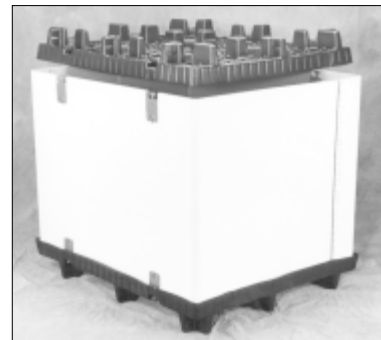

### HERE'S WHAT YOU'VE BEEN WAITING FOR!

This new, durable, high-density polyethylene locking device provides a quick acting secure closure between sleeves and thermoformed polyethylene top and bottom pallets of BIG PAK® returnable and reusable shipping and storage containers.

Self-locking, the Ever-Lok 2 provides safer, simpler and faster closure, and eliminates the need for strapping or shrink wrapping. Sleeves are more securely held to pallets due to the positive action of the twist locking design.

Typical corrugated plastic sleeve with all eight clips located out of normal forklift entry range, preventing handling damage and assuring long life.

Ever-Lok 2 installed on a typical Big Pak corrugated paper sleeve and ready for storage or interplant transport.

**Stackable-collapsible "Big-Pak" now with "Ever-Lok" clips in popular sizes and all sleeve heights.**

**Other sizes and "specials" quoted promptly on request. Minimum quantities may apply. New sizes being added constantly. Call  Ted Thorsen for details.**

The Ever-Lok 2 Clip turns and locks, positively and easily into place as the pallet is pressed into position, and can be visually inspected at all times. The Ever-Lok 2 comes installed on your collapsible sleeves where its flush mount design prevents damage in

use. Recessed within the pallet, the self-locking clip must be physically turned to disengage. This prevents premature release by lateral pressures or accidental bumping. Eight clips are fastened by a bullnose plastic rivet on each sleeve, providing more secure engagement than a grommet fastener.

Ever-Lok 2 Clips are available in bright white to promote safety and visibility. They are removable and replaceable.

**Patent Pending**

**Samples are available.**

**Call Ted Thorsen to discuss your size and quanti-**

A simple twist does the job. The secure locking action on this mechanism can be repeated 1000's of times without loss of function or damage.

**8 "Ever-Lok 2" clips provide a simple, visible positive closure top and bottom.** Bright blue clips promote safety and visibility.

"Ever-Lok 2" holds typical Big Pak loads of up to 1200+ lbs. during stacking, fork handling, and truck transport.

Ever-Lok 2 (Patent Pending)

Clip in "Open" Position

No awkward reaching, no stubborn slides, the action is quick and sure, on top and bottom of every Big Pak. Pallets and sleeves separate easily and completely.

A test in your plant will demonstrate the success of this concept. Call  to make arrangements.

**To remove a Big Pak top or bottom, simply turn the "T" Lock and lift.**

**Big Pak mirror image trays, triple wall sleeves, and "Ever-Lok 2" clips** are the economy team for your interplant transfer and storage requirements.

This simple but highly effective design will work well in your operations. Samples available.

Clip in "Lock" Position

## The Big Pak Mini Sample Story

Accurate and helpful miniature Big Pak sets are available promptly on request. Contact Ted Thorsen today to request a set to start your evaluation process and begin answering questions. Full size samples can follow.

**Original SurLok® Option is Also Available.** 8 "Sur-Lok" clips/unit provide a simple, automatic positive closure top and bottom. The Sur-Lok Clip audibly locks, positively and easily into place as the pallet is pressed into position, and can be visually inspected at all times. To remove a Big Pak top or bottom, simply push Sur-Lok clips and lift.

# For Tough Jobs and Extra Long Life, Ted Thorsen Offers the ALL PLASTIC BIG PAK Container. Self Palletized Shipping System.

## The All Plastic BIG PAK Container

The plastic BIG PAK container is ideal for any reusable shipping or storage and handling application. The Sleeve is manufactured of 10 MM plastic (HDPE) and polypropylene corrugated. The interchangeable base and top are thermoformed, high density polyethylene plastic.

### NOTE:

Option of 1/2 drop gate on one or both sides of sleeve. Optional EverLok<sup>2</sup> self locking mechanism on sides or ends. (eliminates banding) Original SurLok design also available.

### PROVEN BENEFITS OF BIG PAK USE

#### Collapsible

- Maximum Storage in a Minimum Space
- Reduce Return Freight Costs

#### Durable

- Sleeves Used by Major Companies in Excess of 200 Trips

#### Recyclable

- All Components on Big Pak are 100% Recyclable

#### Stackable

- Up to 4 high with 1000 lbs/unit and up to 5 high with 800 lbs per unit loading

All Plastic Big Pak with optional EverLok<sup>2</sup>

### Weather/Moisture Resistant

- Can be Stored Outside
- Field Tested successfully from Below 0° to 130°F

### Lightweight

- Easily Handled by One Person
- Lower Transportation Costs
- Approx. weight per Sleeve - 22 lbs.
- Approx. weight per Pallet - 19 lbs.

### Economical

- Generally Less than 12 Months Payback
- Reduce Packaging Costs
- Eliminate Product Damage
- Locking Clips Available,

Easy Access Drop Gate

### Sets Up and Knocks Down Easy as 1-2-3

Collapsed - Z-fold Design

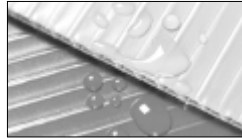

Lift One Side

Open Up

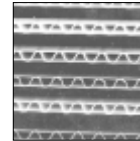

### DURABILITY

Compared to conventional corrugated board, Fluted Plastic is much more resistant to oils, acids, alkali, greases, moisture, freezing temperatures, as well as the other extremes.

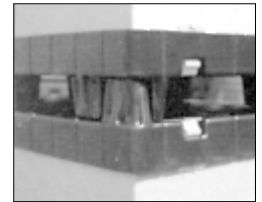

All-plastic BIG PAK sleeve of polypropylene or polyethylene corrugated plastic is weather/moisture resistant.

## BIG PAK Takes the Lead in Collapsible Plastic Sleeve Technology

### Designed for Years of Continuous Service without Replacement Worries

- Remarkable Double Wall Construction
- Live Corner Hinges with No Loss of Column Strength
- Very High Load Stacking Capability
- Molded-In I.D. Option
- Custom Manufacturing Capabilities
- Built in Locking

Big Pak's design and engineering teams created this returnable double wall plastic package for a major chemical firm. It is self locking and stackable, with low-profile storage characteristics. It is fully collapsible with complete customer I.D. information molded-in and specially located.

Groundbreaking double wall technology is the secret of this two piece sleeve design. Let Ted Thorsen and Big Pak work on your special application reusable containers and pallet boxes. They have the experience to recommend practical minimum cost solutions. The new Big Pak "Ever-Lok<sup>2</sup>" can also be fitted to this design.

This unique high strength live hinge takes a potential design problem and creates a reusable Big Pak plastic double wall sleeve that is truly suited for years of intensive re-use. Call Ted Thorsen to discuss costs and payback for your heavy duty project.

# New Bin Quick Collapsible Plastic Pallet Frame

Turns your size 40" x 48" "Big Pak" Trays or wood pallets into sturdy, returnable, multi-use bins.

- Overall Height: 28"
- Usable Interior Height: 23"
- Weight: 47 lbs.

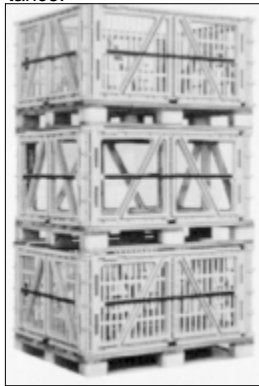

Bin Quick fits 40 x 48 "Big Paks" exactly, providing a sturdy, heavy-duty enclosure with exceptional side strength and excellent interior visibility.

Special fittings allow quick nailing to 40 x 48 wood pallets.

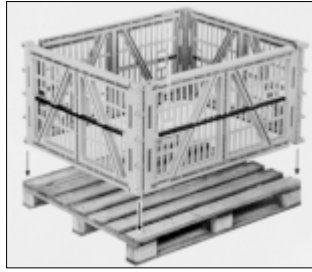

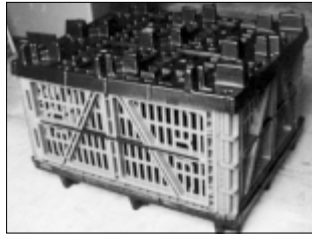

Horizontal steel struts recessed into side framing prevent bowing or distortion.

## Bin Quick Stacked

Capacity is 900 lbs. per unit stacked 3 or 4 high. All components are removable and replaceable. UV stabilized polyethylene construction means easy cleaning and excellent chemical resistance.

**PRICING**  
CALL FOR PRICE  
with quantity  
discounts available.  
Pallets additional.

## Collapsible Wire Sleeves and Patented "Big Pak" Trays Make an Ideal Transfer Container with Complete Visibility

Stackable/Collapsible "Big Pak" Pallets are now molded in more than 25 sizes, with matching wire sleeves available to fit them all. Sleeve heights and access features are customized to your specification.

Other available sleeve materials are corrugated plastic, thermoformed plastic and corrugated paper double and triple wall construction.

"Big Pak" units stack securely using sleeves fabricated from triple wall corrugated, fluted plastic or wire mesh. They are the perfect interplant transfer and in-plant storage or picking container; adaptable and moderate in price.

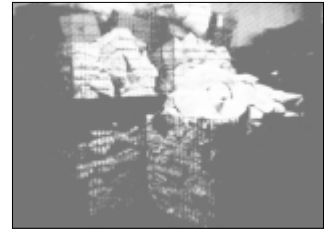

Samples are often available for test and evaluation along with quotes and recommendations.

See pages 1 to 8 of this new Catalog for additional details. Typical prices for standard "Big Pak" complete units vary with size and quantity, but usually range as follows:

**Triple Wall Corrugated Sleeves:**  
[CALL FOR PRICING] including 2 pallets

**Fluted Plastic Sleeves:**  
[CALL FOR PRICING] including 2 pallets

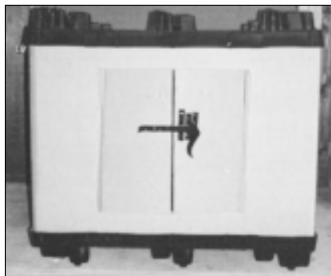

**Wire Sleeves:**  
[CALL FOR PRICING] including 2 pallets

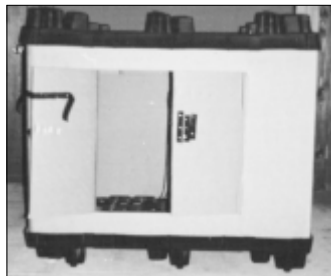

# Introduces new "Big Pak" Sleeve Door Designs

- Improve Access – Pick Orders from Stacked Units
- Add and Remove Contents During Storage or Processing
- Simplify Inventory – Makes Inside Dividers Practical

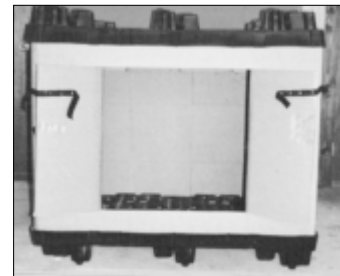

**Other BIG PAK Plastic Pallet Options:**  
**Metal Reinforcement:** Add rigidity and stacking strength  
**Custom Color or Logo:** A different color or logo for each operation.

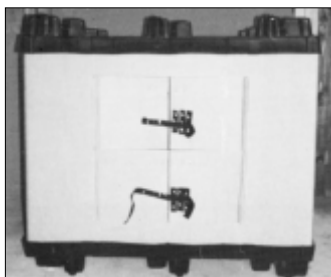

Typical triple wall corrugated construction will fit all Big Pak pallet sizes.

Velcro™ closures are quick, easy, secure on this 2 door model.

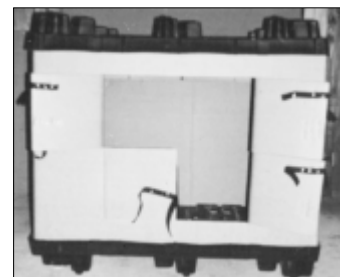

Door opening size is a variable. Describe your loading situation and we will recommend solutions.

4 door version closed with Velcro™ fasteners. Stacked units remain accessible.

Call Ted Thorsen for prompt pricing on pallet sizes and these sleeves in your quantity. Samples available!

This design and other designs also available in corrugated plastic. See page 5 (top), or call for details. Samples available.

## Discover effective handling for yarn and other spool-wound products.

The entire yarn industry has been made more efficient with the Yarn PAK closed-loop, reusable shipping and receiving system for shipping and storing yarn and spool packages.

### The Yarn PAKs versatility in a variety of applications is demonstrated by utilizing:

1. A pallet and a thermoformed configured cap, plus separators designed to gently cradle yarn packages.
2. Standard top and bottom thermoformed pallets with triple-wall fiberboard side-walls. And, both systems can be strapped and/or poly-wrapped

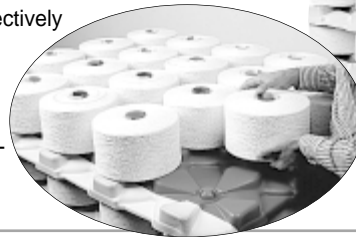

*As an inter-plant shipping system – with or without separator sheets and dividers – Yarn PAKs offer more accessible and safer transit and storage. Interlocking pallet legs allow easy four-way entry and pickup.*

Consistent tare weights (normal weight) increase your warehouse efficiencies by standardizing shipping and handling cost.

Limited by only your imagination, the state of the art construction of Yarn PAK Shipping Systems can be made to fit your special application, or you can choose any of the in-stock models.

Whatever your needs, whatever your specific requirements in shipping, storing or otherwise moving yarns (or other products), a BIG PAK system can be designed to cost-effectively satisfy those needs.

Let us give you all the facts, along with applicable and effective case histories. Give us a call today.

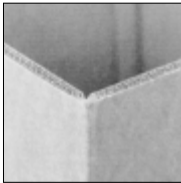

Yarn PAK

## New Heavy Duty Big Pak IBC

The best choice for bulk solids.

Heavier pallet loads can be accommodated by a single sheet .300 gauge or .330 gauge twin sheet pallets, which are available in a large variety of sizes.

For all but the heaviest loose bulk product duties, a combination of a single or twin sheet Big Pak pallet and a four-, five- or six-ply corrugated sleeve provides safe and sure shipment.

*Environmentally friendly, twin sheet top and bottom pallets of the BIG PAK provide many round trips in a closed loop circuit.*

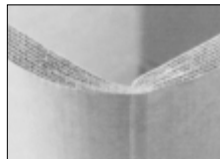

The BIG PAK® IBC is a reusable intermediate bulk container that won't fail. It consists of BIG PAK's specially designed heavy duty pallet molded of high density polyethylene, and a sleeve consisting of seven to nine plies of A-flute corrugated.

It is a super-strong bulk container, providing up to 50,000 lbs. compression strength.

One BIG PAK IBC can be custom designed to hold from 20 to 85 cubic feet, considerably reducing filling and handling labor and time, while increasing production.

BIG PAK IBCs are available in 40" x 48" and 48" x 48" sizes, and meet or exceed all NSTA tests for bulk packaging.

Call  for pricing information and samples.

## Base and Layer Pads

A variety of base and layer pads are available for the interiors of all  totes and containers. Materials include foam and plastic corrugate, which are ideal for all packaging needs. All base and layer pads are designed with finger holes for easy removal. Base and layer pads can also be made with ESD protective material or your materials can be quoted to specifications.

### Features:

- Separates and cushions multiple layers of product
- Protects product from dust during shipping and storage
- Cross-linked polyethylene foam pad available for protecting Class A surfaces
- ESD products also available for electronic applications.
- Die cuts, cut-outs, partitions and separators are also available.

Call Ted Thorsen for current prices.  
Many Sizes in Stock for Prompt Shipment.

**"Big Pak" is used regularly by industrial, retail, government and commercial accounts throughout the U.S., and overseas.** New and improved Twin Sheet Designs carry much heavier loads.

**Specification Information:** Material – Pallets – High molecular weight high density polyethylene – standard Big Pak starting gauge .250 inch (Heavier gauges on request – standard color: black (other colors on special order) Sleeves – Standard – 1100# test weather resistant, CAA flute, Triple Wall corrugated (other weights & designs available).

## REDUCE COSTS AND INCREASE SECURITY

Unlike disposable packaging, reusable shipping containers are an investment not a monthly expense.

Once purchased they are not prone to yearly price increases, supply problems, or disposal costs.

Our reusable shipping containers are the ideal replacement for costly one way disposable containers

in your inter-plant shipping operation.

**Leasing Programs are available. Call ☎ for details.**

Polyethylene containers are lighter than wood or steel, stronger than cardboard and provide the highest degree of moisture resistance. Molded-in pallet base eliminates the need for wood pallets and will accommodate forklift or pallet jack handling. Designed and constructed to perform in the harshest

working environments. Ted Thorsen forkliftable bulk containers are adaptable to any industry.

They provide more efficient handling and storage of raw materials, increased security for your interplant shipments and improved distribution of your finished products.

**Trial units available for your test and evaluation. (Customer pays all freight charges.) Call ☎ for more information.**
