

# Ted Thorsen Presents the Reusable - Removable - Replaceable Container Placard Identification and Labeling Systems

Work Beautifully on Racks, Reusable Containers, Totes, and Factory Equipment of All Types

The Placard

Labels Removed Easily

## A Creative Identification System for Returnable/Reusable Containers and Portable Racks

### Benefits of the Placard:

- Different styles to meet the specific application (see below)
- Can be customized to virtually any shape and size.
- Prevents mislabeled/misidentified containers.
- Keeps containers/racks neat and clean – no more scraping labels.
- Adheres to surfaces in wide ranges of temperatures.
- Accepts most standard label adhesives.
- Can be printed with customized information to identify your containers when labels are not in place.

### The Placard Adheres Reliably to Containers and Racks Made From:

- High Density and Low Density Plastics
- Ribbed Metal Bins (Board Placard)
- Wire Mesh Bins (Die-cut Board Placard)
- Aluminum
- Steel
- Corrugated Fibre
- Painted Metals
- Wood
- Corrugated Plastic

### The "Original" All Purpose Placard

- Opaque, white finish
- Combined long-term indoor and outdoor durability
- Excellent washing capabilities – mild detergents
- Broad service temperature range for hot & cold environments

### The "Industrial" Purpose Placard

- Offers long-term indoor durability
- Limited outdoor use
- Good washing capabilities
- Broad service temperature range for hot & cold environments

### The "C0001" Placard

- Good indoor durability
- Poor outdoor durability
- Excellent for use on fibre and plastic corrugated containers

### How the Placard System Works:

1. Peel Placard away from the liner.
2. Permanently apply the Placard to the container.
3. Place your label on the Placard. The system allows you to use a label to temporarily identify the contents of a container or identify the container for a variety of other uses.
4. Easily remove your label from the Placard without tearing or ripping. When the label is peeled off, the Placard is left in place of reuse with another label.
5. Place a new label on the Placard and start process again.

Patented Process #5,417,790, The Kennedy Group, Cleveland, OH

### THE STANDARD PLACARD SIZES TO CHOOSE FROM:

- 3" x 5"
- 4.5" x 6.5"
- 4.5" x 7.875"
- 6" x 8"
- 14.25" x 10.25"

## The Industrial Board Placard

### Reusable • Removable

A Creative Identification System for Your Reusable Bulk Containers and Wire Mesh Bins

### Features of the Board Placard:

- Can be die cut to any size.
- Easy removal and replacement of labels anywhere on your bulk containers.
- Affixes to a variety of surfaces. • Accepts most standard label adhesives.

### Benefits of the Board Placard:

- Can be fastened to containers with ribbed or uneven surfaces.
- Ideal for wire mesh bins with no locations for labels.
- Prevents mislabeled/misidentified containers which saves time and cost.
- Keeps containers neat and clean.
- Replaces high cost of cardholders.
- Cuts cost of labor and time used to scrape labels.

### STANDARD BOARD PLACARD SIZES AND PRICES

# NEW Bi-Color Stack & Nest System

**Bi-Color straight wall containers are nestable and stackable.**

- Each model features positive locations for secure stacking and clearly identifies stack / nest positions.
- Colors align when stacked
- Colors alternate when nested
- Stack when loaded to protect their contents, nest when empty with a 180° turn.
- Unique, one-piece configuration design allows for dividers, cradles, and dunnage.
- Available in solid and ventilated versions; modular to the 48" x 45" pallet.

## KS Series Nesting Containers With Separate Lids and Special Closures

- Separate Lids
  - Lockable
  - Haz-Mat
  - Waterproof
  - High Value Secure
- Lids and boxes normally available from stock in one or more colors.

Lid for KS18

KS5237 with adjustable cover

KS5 with Lid

KS6200 with Locking Lid

### KS 5

- General purpose nestable container.
- Stacking lid with access for strapping or banding material
- Made of polyethylene.

### KS 9

- Compatible with 48" x 40" pallet systems or Euro-pallets
- Easy to clean
- Pocket handles
- Strong
- Waterfall cover

### KS5237

- Designed for distribution of books and other printed material.
- Lid can be placed at different heights to maximize cube utilization pallets or trailers when containers are partially filled.
- Lightweight but strong.

### KS 43

- Designed for safe transportation of hazardous material according to UN protocol 4H2/x10.5S
- Spill resistant with options for foam gasket and lid clamps

- Automated lifting features
- Designed for conveyor operation
- Made of polyethylene

### KS 18

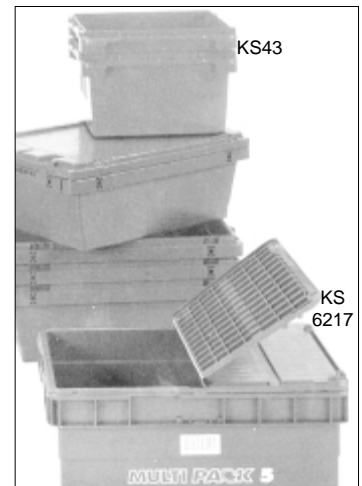

- Designed for large bulky loads
- Withstand harsh use on conveyors
- Excellent nesting ratio
- Ergonomic handles
- Integral label holder, 4" x 2.5"
- Made of polypropylene

### KS6200

- For distribution of high value goods
- Tamper-resistant lid and bill of lading area
- Water resistant
- Designed for automated lid placement and conveyor handling
- Ergonomic pocket handles for manual handling.
- Protected bar code areas
- Compatible with Euro-pallets or 48" x 40" pallet systems.
- Excellent nesting ratio
- Strong
- Made of polypropylene

### KS6217 and KS 4217 (KS 4217 not shown)

- Two sizes, three footprints, one height
- Available in blue
- Made of polypropylene
- Designed for distribution
- Pocket handles
- Protected bar code areas
- Nestable lid, cover fits inside container
- Secure stacking stops
- Waterfall lid for water resistance
- Lid secured with ties or banding
- Automated lid placement on container
- Compatible with 48" x 40" or Euro-pallet
- UN transport approved for hazardous material according to protocol 4H2/Y18/S

# All Purpose 180° Stack and Nest Containers • Designed for Rough Service

## Injection Molded for Strength and Light Weight

Stack and Nest Designs are the workhorses of most factory and warehouse applications.

### Description

Returnable, reusable stack and nest containers, injection-molded from high-impact polyethylene or polypropylene. USDA and FDA approved. Used in general manufacturing, food processing and product distribution. Covers are available for some models Standard color: gray (red, beige and other colors on request)

**NOTE:** Matching steel dollies are available for most totes below. See last column for pricing.

### FEATURES:

- Uniform wall thickness provides maximum strength. Load capacity is 70 lb./box.
- Rim handgrips on ends for easy lifting and carrying comfort.
- Containers won't rust, rot or corrode, and resist damaging effects of oil, most chemicals, solvents, water and steam.
- Containers withstand wide temperature variances.
- Uniform container weight allows accurate inventory by weight.
- Easily cleaned, making them ideal for handling unpackaged products.
- Designed without sharp edges, burrs or splinters, permitting safe handling of containers.
- Stackable with or without covers.
- Nest at 180° when empty.
- Available matching covers protect your product from moisture, impact, chemicals and pests.
- Wide range of available accessories, including covers, document holders, security fasteners, grommets, metal bar code plates dollies and a special grip material.
- Containers available in both High Density Polypropylene or High Density Polyethylene.
- Dollies available. See prices below.

**Stack & Nest totes** are a smart buy. Ideal for conveyor handling and work-in process, these durable totes stack when full and nest when empty for efficient storage and transportation.

**Positive stacking** - You can stack our totes securely, with or without lids. Totes stack up to nine high.

**Consistent tare weight** - Your loads can be precisely calculated, every time.

**Worker safety** - You can safely handle stack & nest totes; there are no burrs, splinters, or sharp edges. The built-in hand grips provide comfort when carrying and lifting.

### OPTIONS

- Footprint size of 24" x 16". Height options: 9", 11", or 14".
- Choice of solid or vented walls and base.
- Material: Injection molded of high performance polypropylene.
- Molded-in logo available on container base.
- Standard color is green; custom colors available upon request.

### THREE-YEAR WARRANTY

Products are warranted for three years against defects in materials and workmanship.

**NOTE:** These totes are normally in stock, but deliveries may be delayed occasionally by stock-outs and waits for production runs.

# FIX BOX Stack and Nest Containers • Available in 4 Stock Colors – Red, Yellow, Green, Blue

All **FIX** stack and nest containers are strong and versatile. They have unlimited use in the storing and shipping of materials. They stack when filled and nest easily when empty, minimizing storage and transport costs.

(54) The space saving stack and nest principle

# 6 New Stack and Nest Totes Available from Stock in 3 Colors

## AKRO-N.S.T. Nest — Stack — Tote

N.S.T.'s are designed for storage, transfer and shipping of various contents. They stack one with another or "nest" when turned 180 degrees to occupy minimal space. The totes are available in three sizes with optional lids to protect contents from dust & damage.

Containers are made from high density polyethylene. This material is resistant to solvents and chemicals as well as stress cracks. It is listed with the USDA.

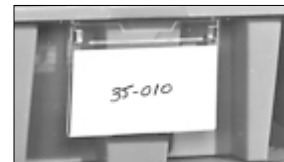

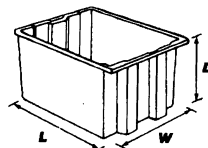

N.S.T.'s won't rust, corrode or bend out of shape. Structure includes ridges under the lip that prevent jamming when containers are nested. The container lip is designed to form comfortable grab handles for easily carrying loaded totes. The design facilitates easy cleaning. Strong construction and injection-molded polyethylene materials forms a container that can be reused and reused in almost any application.

N.S.T.'s "nest" when not in use to conserve storage space; they stack when turned 180° for dense storage and shipping of contents.

NOTE: Many other sizes and designs are available. Add 5% for Red and Blue. Yellow, Green, Off White, Black, and Brown please call Ted Thorsen.

3418 is in use at Cleveland Chair Company.

**Tote-All Standard Boxes** come in smooth and extra-strong ribbed constructions. Perfect for applications ranging from conveyor and storage to inventory control. All are reinforced with beveled bottom corners. Special design permits boxes to be nested with lugs that prevent jamming. Specially treated non-skid bottoms are available at slight extra cost. Most boxes available promptly from stock.

### STANDARD BOXES:

Stock color is **gray**.

Other colors available in all containers.  
 Red and blue colors usually in stock.  
 Premium charge is 10% for red and blue.  
 Other colors may be higher, usually 15% premium. Please call Ted Thorsen.

# Do you have an unusual Tote Box requirement?

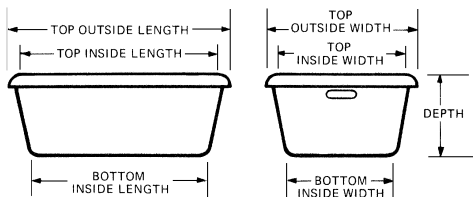

## Select A Special Box From Ted Thorsen

### Specifications SPECIAL BOXES

Photos of several boxes are shown below.

Ted Thorsen maintains molds for heavy-duty plastic tote boxes in a wide range of styles and capacities. Although some of these boxes are not regularly stocked, all are available through special order.

NOTE: Box styles vary. Please call Ted Thorsen to verify that the design, appearance, and function of the box you have selected are well matched to your needs.
