CUTTING & PRODUCTION TABLES

PUT OUR TABLES TO WORK IN YOUR CUTTING ROOM OPERATION.

These tables are built with the heaviest standard frame in the industry. Every piece of framework is made of 12 gauge steel. We use only the cold drawn steel because of its greater tensile and yield strength. The legs feature full 1 1/2" deep channels to insure maximum strength.

Table tops consist of high quality tempered hardboard panels with screened backs for better adhesion to the table core. These specially designed panels are made of eucalyptus fibers compressed through a heat process to create a very smooth and durable surface. The table core consists of 45 lb/ft³ density board to withstand the heaviest loads.

Our table tops have beveled lower edges (unique in the industry) to allow perfect fit with the side aprons. Steel splines connect sections securely for a smooth continuous surface. Our precision workmanship makes the table assembly a breeze.
