

Maxx-Ergo Lifter Model LP-MXE-150

The MAXX-ERGO-LIFTER is a highly maneuverable light capacity lifter designed for multiple material handling applications. It is equipped with a standard platform and has a load capacity of 330 lbs.

Ideal for assembly operations, ergonomic applications and other material handling needs. The MAXX-ERGO-LIFTER features a lift/lower button on a flexible control cord that allows the operator to be in the most comfortable position while lifting or lowering loads. The electric lift is battery operated and features an on board charger that runs on 110 volt input.

Also available are several optional attachments that customize the unit for specific applications including roll and coil handling attachments and a tote lifter attachment that are bolted on permitting the unit to be changed back to the standard platform when required.

Specifications:

- Model LP-MXE-150
- Capacity: 330 lbs. at 9" load center
- Maximum Platform Height: 59"
- Lowered Height: 5"
- Straddle I.D.: 18.75"
- Staddle O.D.: 23.25"
- Platform Size: 18.5" x 23.5"
- Overall Size: 35" x 23.5" x 70"
- Steer Wheels: 5" swivel with brake
- Load Wheels: 3" swivel
- Lift/Lower button on flexible control cord
- Battery Included: 24 volt maintenance-free
- Charger Included: Automatic; On-Board
- Lift Speed: Approximately 26 seconds

LP-MXE-150 Price:

• Weight: 150 lbs. • Shipping Class: 70

Optional Attachments:

Attachment LP-A-1 is used for rolls or coils that require lifting from underneath. Ideal for placing rolls on and off a shaft.

Attachment LP-A-2 is a single ram suited for lifting coils or rolls through the core. The ram length is 24" long and 2" in diameter.

Attachment LP-A-3 is a dual ram arrangement. The ram length is 17.75" long and 2" in diameter. The distance between the ram is 6". It can be used to cradle rolls or can handle 2 small rolls at one time through the core.

Attachment LP-A-4 is a roll handled designed to handle rolls in the vertical and horizontal position (poker chip position). The unit features an expandable ram that holds the roll by expanding in the core by turning the wheel pictured. The ram is 11" long and is 2.9" in diameter.

LP-MXE-150 Attachment Prices:

LP-A1 V-Platform... Add **\$100.39**

LP-A2 Single Ram... Add **\$100.39**

LP-A3 Dual Ram... Add **\$150.58**

LP-A4 Roll Handler Upender... Add **\$296.51**

BENCH TOP TILTERS

Ergonomic Bench Top Tilters reduce worker fatigue & maximize comfort & safety.

- Loads up to 1000 lbs. may be tilted 0° to 45°.
- Heavy-duty steel tilters can be attached to most industrial table tops, workbenches and mobile lift tables of sufficient load capacity and surface size.
- Pendant hand control with UP/DOWN push buttons is located on a convenient 8 foot cord.
- Flat base plate with slotted holes for installation.
- Tilting top: powder coated silver. Base: painted royal blue
- **Manually Adjustable Tilter** is used for applications requiring only occasional changes in tilt angle.
- **Electro-Mechanical Internal Operating Mechanism** (linear actuated) will lift a maximum of 500 lbs. up to a 45° angle from 5" lowered ht.
- **External Operating Mechanism** (linear actuated) will lift a max. of 1000 lbs. up to a 45° angle from 5" lowered ht.

Bench top tilters have a sliding top which tilts within its own base frame. The center of the platform is kept closer to the center of the base, providing for higher stability than the conventional hinge style tilter.

Model Number	Operation	Plat. Size	Capacity	Max. Tilt	Ship Wt.	Price

GROUND SCISSOR LIFT TABLES

Designed for use when powered fork trucks are not available.

- Pallets can be loaded onto table with pallet trucks and raised to an ergonomic working height
- Front side electric toe guard to protect pinch points during lowering of table
- Velocity fuse to maintain platform height regardless of hydraulic pressure
- Foot control • Maintenance prop
- Upper travel limit switch to stop table at max. height, reducing motor wear
- 2 HP, 208-230/460V, 3-phase, remote 60 Hz totally enclosed motor
- Motor is remote and can be located up to 8 feet away from table
- 3000 psi hydraulic components rating

SCISSOR LIFT TABLES

Electric Hydraulic Scissor Lift Tables

Full featured electric hydraulic scissor lift tables are used by all types of manufacturing and warehouse facilities. Safety features include: electric toe guard to protect pinch points during lowering of the table, brass velocity fuse to maintain platform height regardless of hydraulic pressure, 24V AC push-button hand control, maintenance prop, and upper travel limit switch to stop table at maximum height reducing motor wear. 2HP, 460V, 3 phase, 60 Hz totally enclosed motor standard, other voltages available. 3000 psi hydraulic component rating.
