SkidMarx® Lightweight Recycled Plastic Pallets

A good choice for export shipments to countries restricting wood pallet entry.

Constructed of Recycled Resin • Less than 16 lbs.
True 4-way entry • 2,000 lb. dynamic load
One piece, injection molded • 40" x 48" x 6"
Drain holes, steam cleanable • Weather resistant
Not stackable.

Quantity pricing available for 50+ units. Please call.

Important Notice: These pallets are designed to handle uniform, evenly distributed loads. Pallet legs must be supported by sturdy surface at all times, thus they will not work in an open rack system. Dynamic load rating of 2,000 lbs. means that is the maximum recommended weight to have on a pallet while it is being moved. Skidmarx® pallets are sold with the understanding that the customer will test them under actual conditions of use and will be solely responsible to determine the suitability of pallets for their intended use.

Inca Presswood "Greener Earth" Pallets

Inca Pallets are the "Greener Earth Pallet" because they are produced from a pre- and post- industrial wood waste and low grade timber. Inca Presswood Pallets are strong, solid and nestable. Incas do not contain nails, staples or sharp edges that might damage product or injure personnel. They are manufactured in one piece from a combination of sized wood fibers and synthetic resin. Efficient stacking and 4-way fork entry are Inca Pallet features. - Call for other sizes.

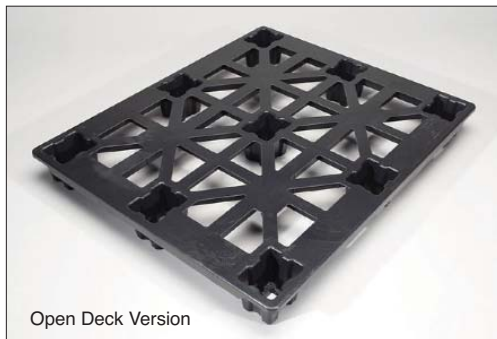

NOTE: \$145.00 Handling fee for orders less than 100 pallets.
